SUMMARY

Backend-focused Full Stack Developer with 1.5 years of experience building scalable IoT platforms on GCP. Delivered 19+ microservices and 20+ REST APIs with sub-100ms latency and 70% downtime reduction. Proficient in Node.js, TypeScript, Python, MongoDB, Docker, and CI/CD. Published AI researcher (Zenodo, 2025). Strong problem-solving skills with 200+ DSA problems solved on LeetCode.

SKILLS

Backend: Node.js, Express.js, TypeScript, Python, REST APIs, WebSockets, Microservices
Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS
Databases: MongoDB, PostgreSQL
Cloud & DevOps: AWS (EC2, S3), GCP (Cloud Run, Pub/Sub), Docker, GitHub Actions, CI/CD
Tools & Security: Jest, Pytest, Postman, Git, JWT, Rate Limiting, Input Validation

PROFESSIONAL EXPERIENCE

Full Stack Developer (Full-Time) Nov 2024 – Mar 2026
Stratosfy — Remote *Ottawa, Canada*

- Led development of a production IoT temperature monitoring platform (500+ devices); shipped **20+ REST APIs** and **19+ microservices** on **GCP (Cloud Run, Pub/Sub)** via **Docker** at **sub-100ms** latency
- Reduced system downtime by **70%** through MongoDB schema optimisation, aggregation pipeline tuning, and proactive alerting via **GCP Cloud Logging**
- Achieved **80%+ Jest** test coverage; enforced quality via **GitHub Actions** CI/CD, cutting regression rate by **40%** and securing endpoints with **JWT, rate limiting, and OWASP-aligned validation**
- Delivered across **6-person** distributed Agile team (2-week sprints) using React.js, Node.js (TypeScript), Python, and MongoDB

Backend Developer May 2024 – Oct 2024
R K Microns *Rajasthan, India*

- Built backend pipelines for a defect detection system using **Python**; improved detection accuracy by **35%** and reduced manual inspection effort by **2 hrs/day** across 10+ operators
- Collaborated with a Flutter frontend team to integrate backend processing with real-time visualization

KEY TECHNICAL PROJECTS

Real-Time Chat Application | *MongoDB, Express.js, React.js, Node.js, Socket.io*

- Built real-time messaging with **Socket.io** supporting group/private chats and typing indicators at **sub-50ms** delivery; handled **10,000+** messages with cursor-based MongoDB pagination
- Deployed responsive React.js + Tailwind UI on **AWS EC2** with NGINX reverse proxy

Task Management System | *MongoDB, Express.js, React.js, Node.js, Docker, WebSockets*

- Built Kanban task manager with **JWT** auth, drag-and-drop, **10+ REST APIs**, and real-time activity feeds via **WebSockets**; deployed on **GCP Cloud Run** via **Docker** with **99.9%** uptime

AI-Based Voice Assistant | *Python, NLP, Speech Recognition*

- Developed an NLP-based assistant using **Python** with speech recognition and text-to-speech pipeline
- Integrated Gmail, WhatsApp, YouTube, and weather APIs for voice-controlled automation; published as **Jarvis: AI-Powered Voice Genie** at zenodo.org/records/15123556 (2025)

EDUCATION

Rajeev Gandhi Memorial College of Engineering & Technology 2021 – 2025
B.Tech in Computer Science & Business Systems *CGPA: 8.01/10*

CERTIFICATIONS & PROBLEM SOLVING

Problem Solving: Solved 200+ Data Structures & Algorithms problems on LeetCode; completed 30 Days of JavaScript Challenge; Solved Top SQL Interview Questions on Leetcode
Cloud: NPTEL – Cloud Computing, IoT (2024) | AWS Educate Badges (2026)
Industry: Python – IBM (2026) | Postman API Expert (2025)
Database: MongoDB Skill Badges (2026)
