SUMMARY

Backend-focused Full Stack Developer with 1 years of experience building scalable IoT platforms on GCP. Delivered **19+ microservices** and **20+ REST APIs** with sub-100ms latency and 70% downtime reduction. Proficient in **Node.js, TypeScript, Python, MongoDB, Docker**, and CI/CD. Published AI researcher (Zenodo, 2025). Strong problem-solving skills with **200+ DSA problems** solved on LeetCode.

TECHNICAL SKILLS

Backend: Node.js, Express.js, TypeScript, Python, REST APIs, WebSockets, Microservices
Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS
Databases: MongoDB, PostgreSQL
Cloud & DevOps: AWS (EC2, S3), GCP (Cloud Run, Pub/Sub), Docker, GitHub Actions, CI/CD
Tools & Security: Jest, Pytest, Postman, Git, JWT, Rate Limiting, Input Validation

PROFESSIONAL EXPERIENCE

Full Stack Developer (Full-Time) Apr 2025 – Mar 2026
Stratosfy (Remote) Ottawa, Canada

- Led development of a production IoT temperature monitoring platform (**500+ devices**); shipped **20+ REST APIs** and **19+ microservices** on GCP (Cloud Run, Pub/Sub) via Docker at **sub-100ms** latency
- Reduced system downtime by **70%** through MongoDB schema optimisation, aggregation pipeline tuning, and proactive alerting via GCP Cloud Logging
- Engineered a real-time IoT dashboard in **React (TypeScript)** with WebSocket-driven live device feeds; optimised re-renders via **React.memo** and **useMemo**, achieving **sub-200ms** UI refresh on **500+ concurrent device** streams
- Achieved **80%+ Jest** test coverage; enforced quality via GitHub Actions CI/CD, cutting regression rate by **40%** and securing endpoints with JWT, rate limiting, and OWASP-aligned validation
- Built complex multi-step device configuration forms using **React Hook Form + Zod** schema validation, reducing invalid API submissions by **45%** and improving field-technician onboarding flow
- Delivered across **6-person** distributed Agile team (2-week sprints) using React.js, Node.js (TypeScript), Python, and MongoDB

KEY TECHNICAL PROJECTS

Real-Time Chat Application | *MongoDB, Express.js, React.js, Node.js, Socket.io*
* Built real-time messaging with Socket.io supporting group/private chats and typing indicators at **sub-50ms** delivery; handled **10,000+** messages with cursor-based MongoDB pagination

Timesheet Management System | *React.js, Node.js, Express.js, MongoDB, REST APIs*
* Designed and built a role-based timesheet system with Employee → Manager submission and approval workflow; developed **REST APIs** for real-time data sync and interactive dashboards for productivity and time utilization

AI-Based Voice Assistant | *Python, NLP, Speech Recognition*
* Developed an NLP-based assistant using Python with speech recognition and text-to-speech pipeline
* Integrated Gmail, WhatsApp, YouTube, and weather APIs for voice-controlled automation; published as *Jarvis: AI-Powered Voice Genie* at zenodo.org/records/15123556 (2025)

EDUCATION

Rajeev Gandhi Memorial College of Engineering & Technology 2021 – 2025
B.Tech in Computer Science & Business Systems CGPA: 8.01/10

CERTIFICATIONS & PROBLEM SOLVING

Problem Solving: Solved **200+** Data Structures & Algorithms problems on LeetCode; completed 30 Days of JavaScript Challenge; Solved Top SQL Interview Questions on LeetCode
Cloud: NPTEL – Cloud Computing, IoT (2024) | AWS Educate Badges (2026)
Industry: Python – IBM (2026) | Postman API Expert (2025)
Database: MongoDB Skill Badges (2026)
